1. Introduction

Alberto Clocks is a website for displaying wall, luxury and vintage clocks. Visitors can explore the product collection, read product information, use a shopping cart, create a demonstration account and view store details.

This guide explains how to open the website and use its main features. It includes instructions for the Home section, product collection, product details, cart, checkout, account forms, wishlist, reviews, Store Locator and Support section.

1.1 What You Need

- A modern browser such as Chrome, Edge, Firefox or Safari.
- The complete E-project folder.
- An Internet connection for remote pictures and the embedded map.
- Visual Studio Code and Live Server to open the project locally.

1.2 How to Open the Website

The website loads its product information from `data/products.json`. For this reason, it should be opened through a local server instead of double-clicking `index.html`.

1. Open the E-project folder in Visual Studio Code.
2. Install the Live Server extension if needed.
3. Right-click `index.html`.
4. Select **Open with Live Server**.
5. Wait for the website to open in the browser.

If the product list does not appear, check that Live Server is running and that `data/products.json` is present.

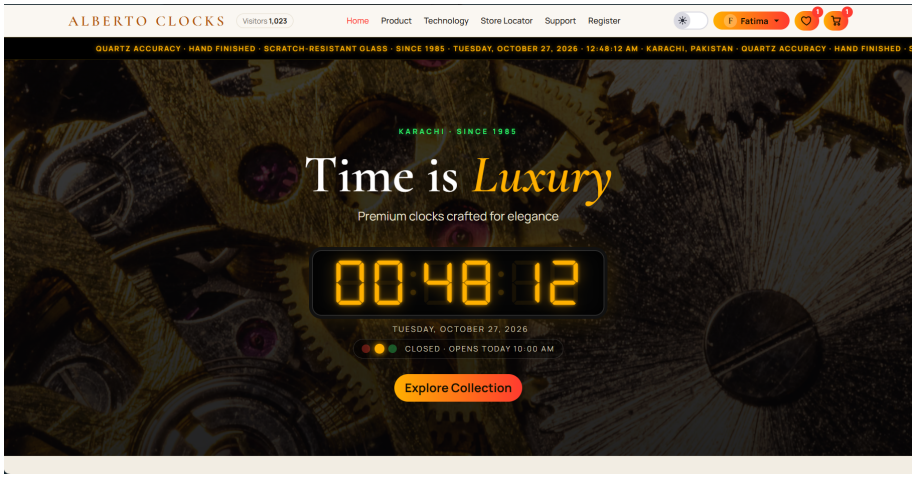

Figure 1: Home page of Alberto Clocks

2. Project Folder Structure

The project is arranged into folders so that pages, styles, website actions, product information, pictures and fonts are kept separately.

```
E-project/
|-- index.html
|-- README.md
|
|-- css/
|   |-- about.css
|   |-- accessibility.css
|   |-- auth.css
|   |-- base.css
|   |-- bootstrap.min.css
|   |-- cart-footer.css
|   |-- features.css
|   |-- forms-faq.css
|   |-- header.css
|   |-- hero-bg.css
|   |-- hero.css

|   |-- reviews.js
|   |-- security.js
|   |-- ui.js
|   |-- wishlist.js
|
|-- pages/
    |-- product.html
```

2.1 Main Files

- `index.html`: main page and its website sections.
- `pages/product.html`: full details page for one clock.
- `css/style.css`: imports the other CSS stylesheets.
- `data/products.json`: contains product information.
- `js/`: contains the code used for interactive features.
- `image/`: contains website illustrations and clock pictures.
- `fonts/`: contains the digital clock font.
- `README.md`: project notes and settings.

3. Header and Navigation

The header appears at the top of the website. It contains the Alberto Clocks name, main menu, theme switch, login button and cart button.

- **Home**: moves to the Home section.
- **Product**: opens the clock collection.
- **Technology**: shows information about the store and clock features.
- **Store Locator**: displays store details and the map.
- **Support**: opens FAQs and contact information.
- **Register**: moves to the registration form.
- **Login**: opens the account window.
- **Cart**: opens the shopping cart.
- **Wishlist**: opens saved clocks.

On a small screen, the navigation is collapsed into a menu button. Press the button to show the links, then select the required section.

Figure 2: Header and navigation bar

3.1 Theme Switch

Use the theme switch to change between dark and light mode. The website remembers the selected theme in the current browser.

3.2 Ticker

The ticker displays date, time, location information and store highlights. The browser may ask permission to use location. The site can still be used if location permission is denied.

3.3 Footer

The footer contains navigation links, store details, opening hours and the newsletter form. The newsletter form displays a confirmation message, but it does not send a real email.

Figure 3: Website footer

4. Home Section

The Home section introduces Alberto Clocks with the slogan *Time is Luxury*. It includes the digital clock, date, store status, LED colour buttons, world-time cards and a link to the collection.

1. Open the website through Live Server.
2. Check the digital clock near the top of the page.
3. Read the store status below the clock.
4. Press an LED colour button to change the theme.
5. Press **Explore Collection** to go to the products.

Figure 4: Digital clock and home controls

4.1 Store Status

The displayed hours are Monday to Saturday, 10 am to 9 pm, and Sunday closed. The status may show Open, Closing Soon, Opening Soon or Closed.

These are the hours set in the website. The status is not connected to live store information.

Figure 5: Store opening status

4.2 LED Colour Buttons

The red, amber and green buttons change the website's accent colour. They can also open a clock from a related product category.

Figure 6: LED colour controls

4.3 World Time Cards

The world-time cards show the current time for Karachi, Dubai, London, New York and Tokyo. JavaScript updates the time in the browser.

Figure 7: World time cards

5. Product Collection

The Product section displays the available clocks. The project contains 24 clock records divided into Wall, Luxury and Vintage categories. The collection shows six products per page.

Each product card can show an image, name, category, price, stock information and shopping controls.

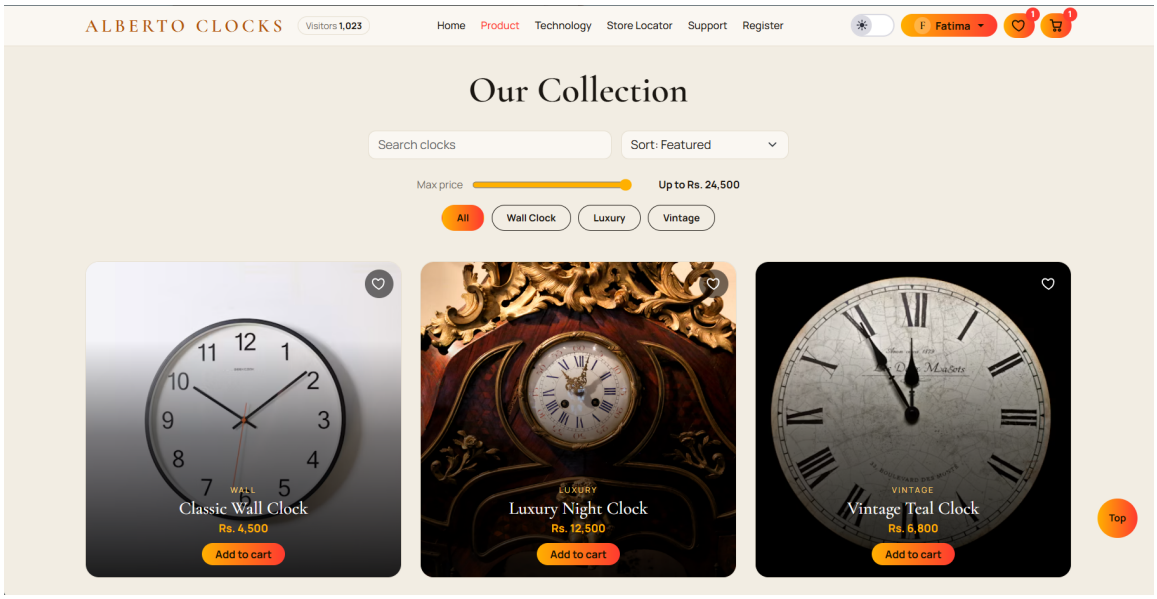

Figure 8: Product collection

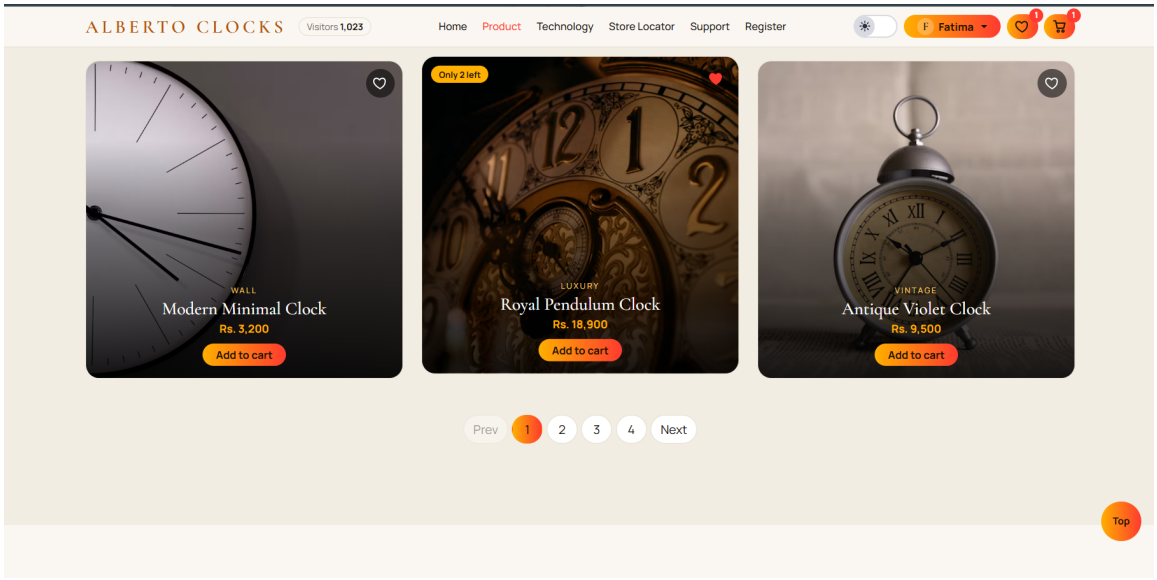

Figure 9: Product collection

5.1 Searching for a Clock

1. Find the search box above the product cards.
2. Type part of the clock's name.
3. The matching product list updates.
4. If no clock matches, change the search text or filters.

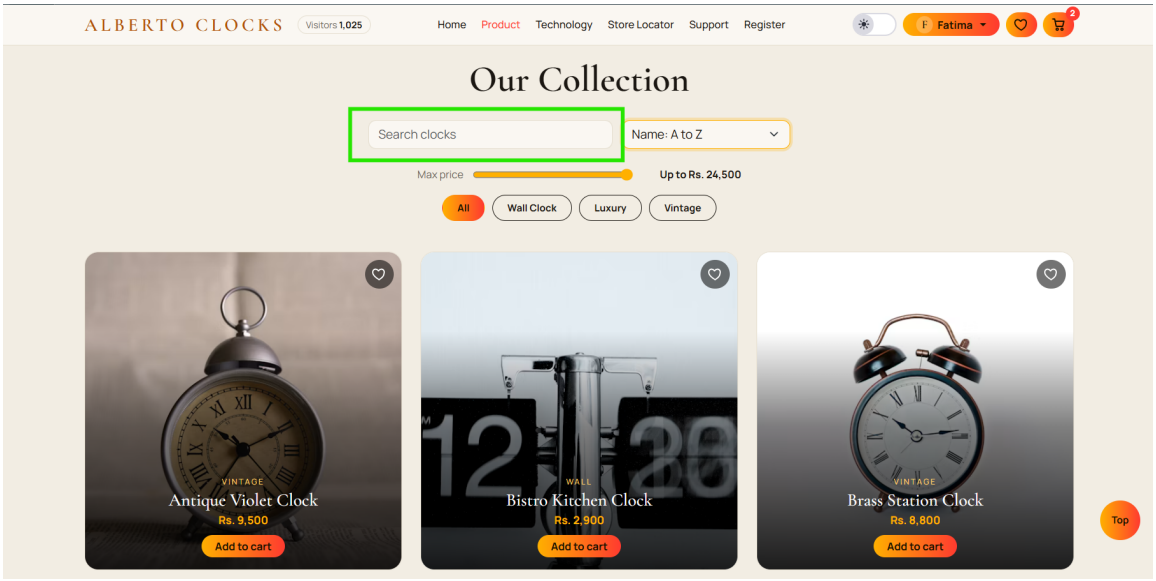

Figure 10: Searching the product collection

5.2 Sorting Products

Use the sort menu to arrange products by featured order, price from low to high, price from high to low, or name from A to Z.

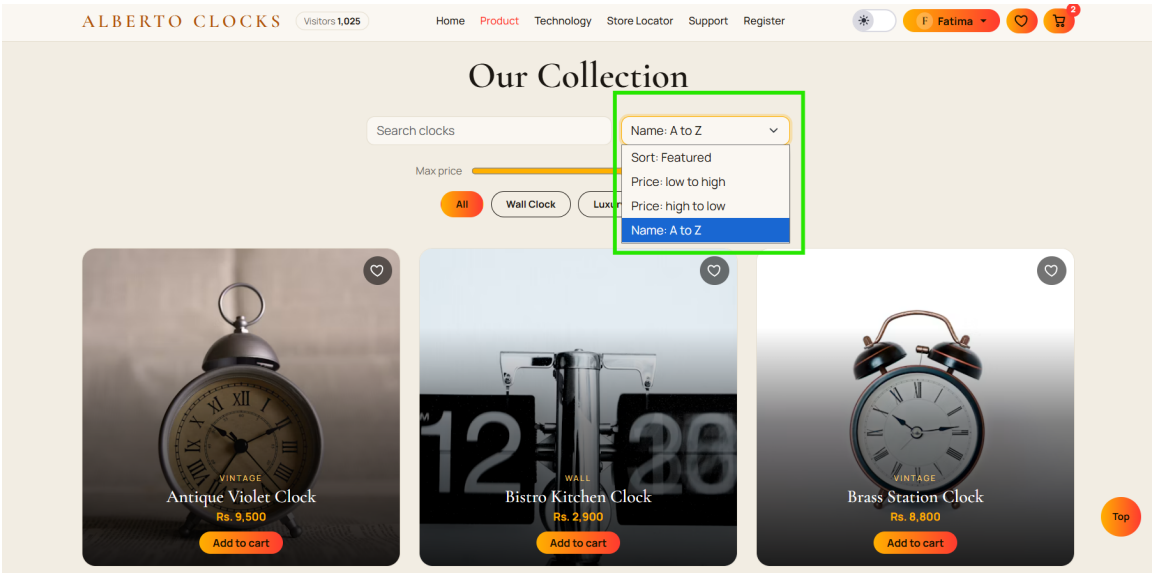

Figure 11: Product sorting controls

5.3 Filtering by Category

Select All, Wall, Luxury or Vintage to display a category. The selected category is highlighted. Search and category filtering can be used together.

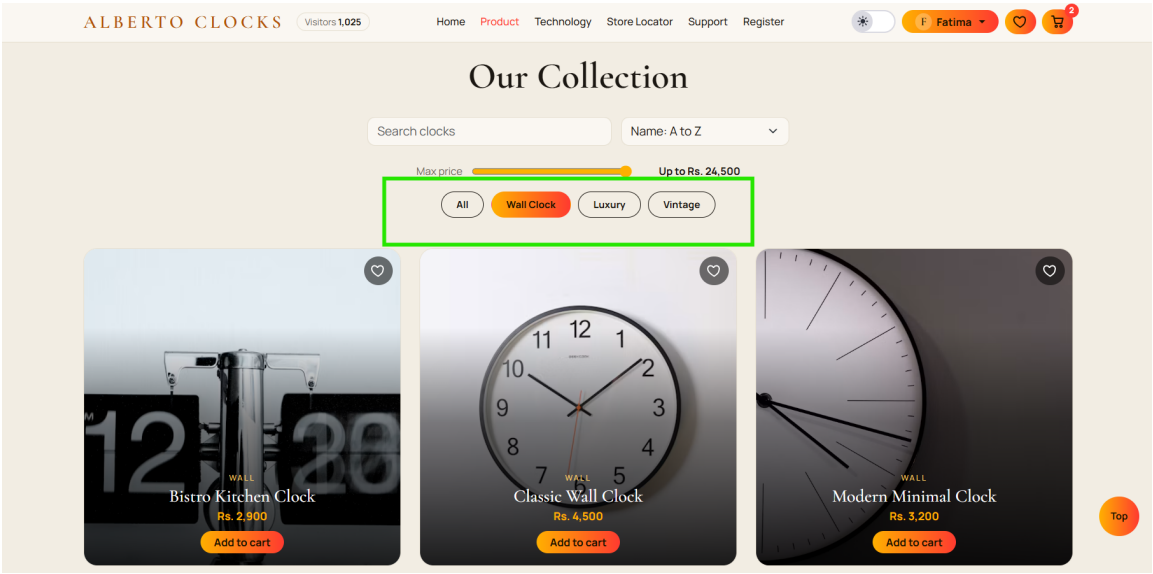

Figure 12: Product category filters

5.4 Using the Price Slider

Move the maximum-price slider to show clocks at or below the selected price. The displayed price limit and number of matching products change.

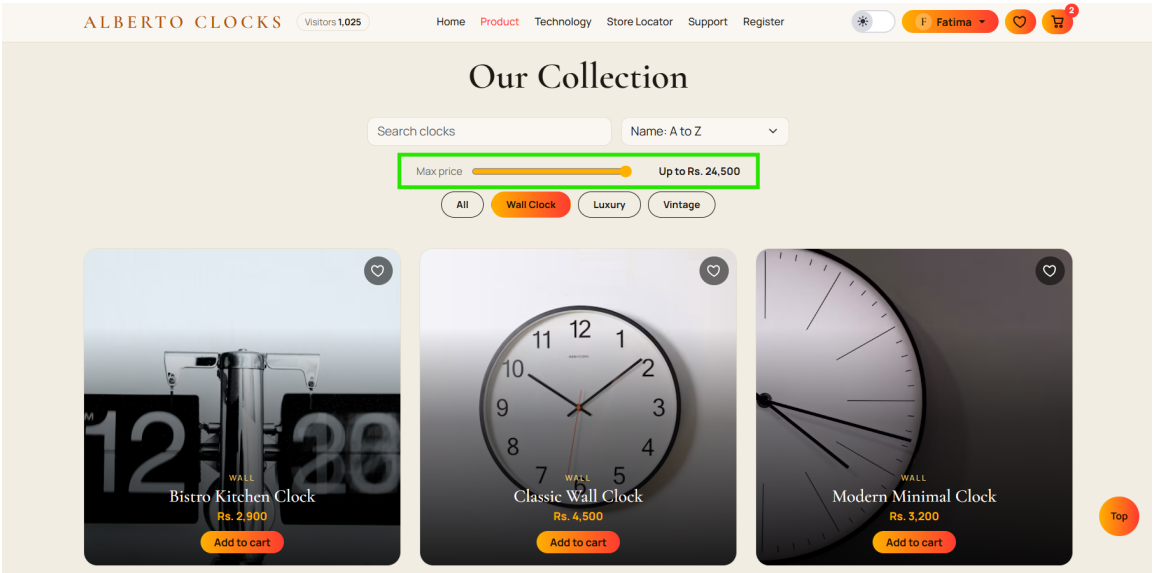

Figure 13: Maximum-price slider

5.5 Changing Product Pages

Use Previous, the page numbers and Next below the cards to move between product pages. When search or filters change, the list returns to its first page.

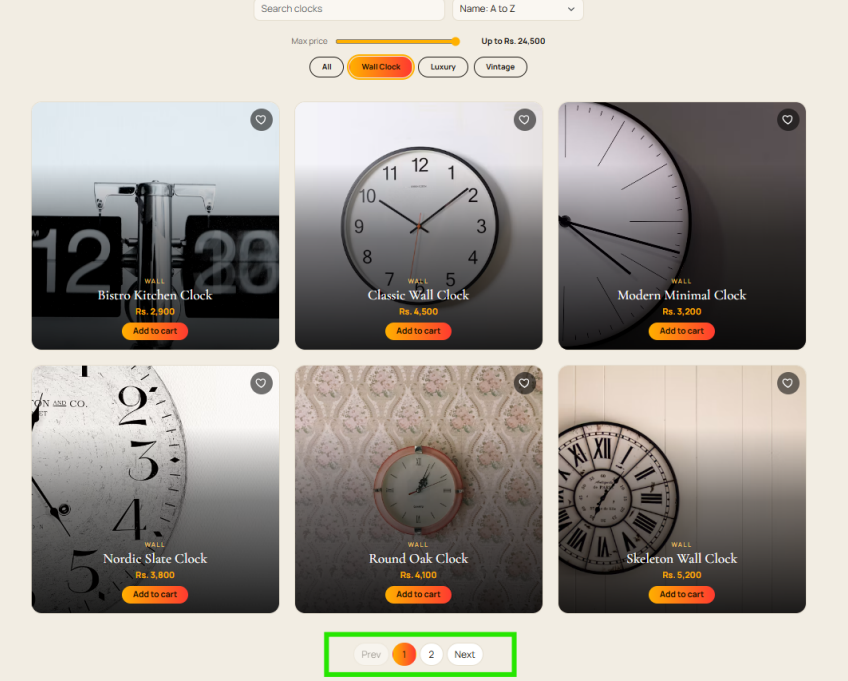

Figure 14: Product page controls

5.6 Product Cards

Each product card shows product information and provides controls to add the clock to the cart or save it to the wishlist.

- The product image or fallback illustration.
- Product name, category and price.
- Add to Cart button.
- Heart button for the wishlist.
- Stock and review information, when available.

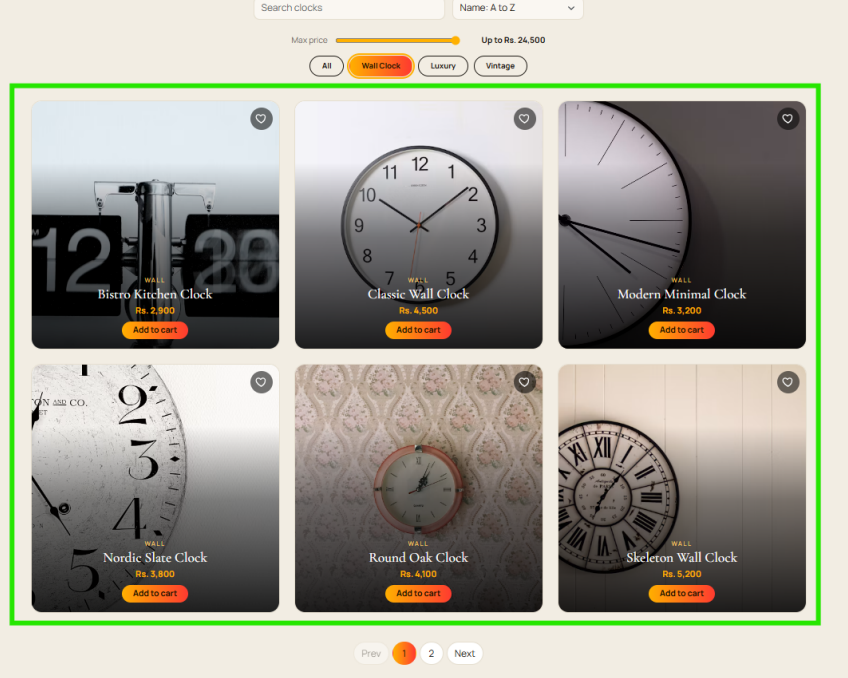

Figure 15: Product card and controls

5.7 Image Fallback

If the main product picture fails, the website tries a local fallback. If the fallback is also unavailable, a clock illustration can be drawn.

6. Product Details

Click a product name or picture to see more information.

6.1 Product Details Popup

The popup displays the selected clock, price, description and specifications. Use Add to Cart to add the clock or Open Full Page to view its full details.

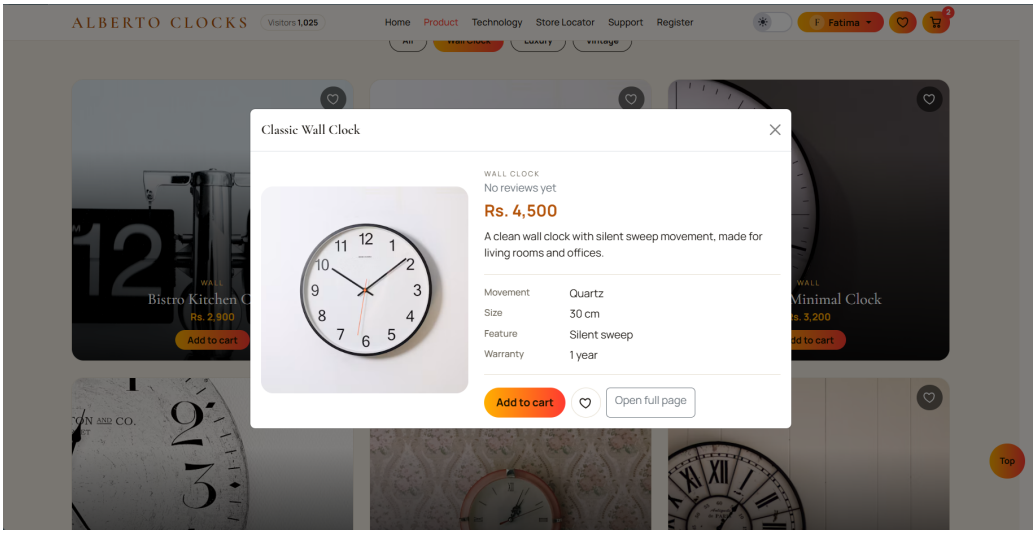

Figure 16: Product details popup

6.2 Full Product Details Page

The page `pages/product.html` displays a larger picture, name, price, description, specifications, stock, quantity controls, wishlist button, related products and reviews.

1. Open a clock from the product collection.
2. Read its description and specifications.
3. Check whether it is in stock.
4. Change the quantity if required.
5. Press Add to Cart.
6. Use the breadcrumb or back link to return to the collection.

The product ID is passed in the page address, for example `pages/product.html?id=1`.

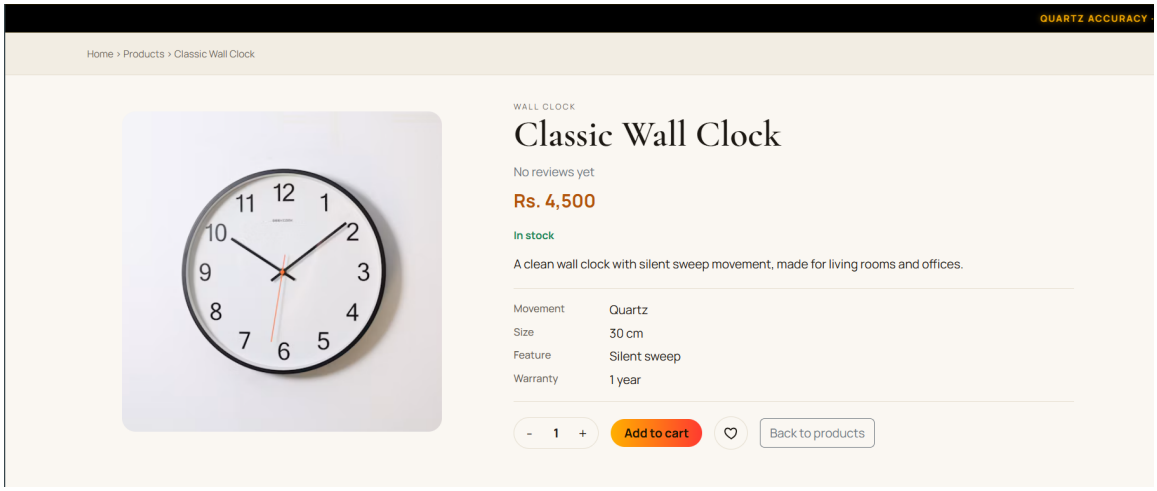

Figure 17: Full product details page

7. Shopping Cart

Press the cart button in the header to open the cart panel.

- Use plus and minus to change a product's quantity.
- Press Remove to remove a clock.
- Use Clear to empty the cart.
- The total changes when quantities change.
- A sold-out clock cannot be added.

If the cart is empty, the website shows an empty-cart message and a link back to the product collection.

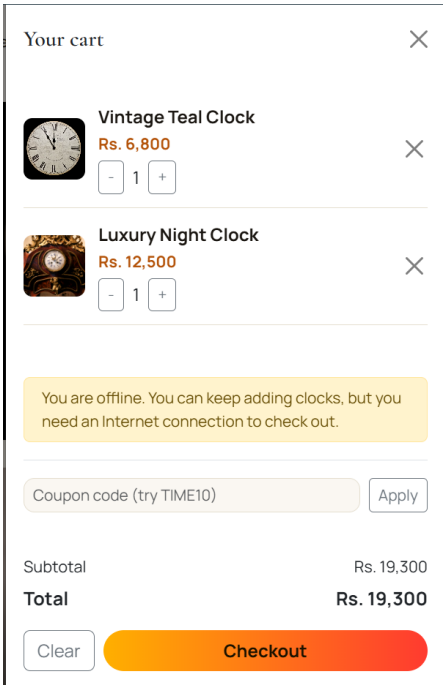

Figure 18: Shopping cart panel

7.1 Using a Coupon

The project includes a demonstration coupon, `TIME10`.

1. Open the cart.
2. Type TIME10 into the coupon field.
3. Press Apply.
4. Check the discount and updated total.

This is a built-in demonstration coupon, not a live store promotion.

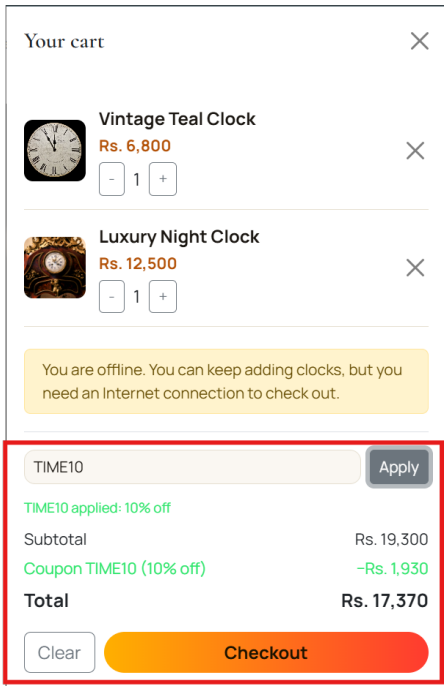

Figure 19: Coupon field and updated total

8. Checkout and Demo Order

Checkout demonstrates how a customer could enter details and review an order. It does not take a real payment.

8.1 Steps to Place an Order

1. Add the required clocks to the cart.
2. Open the cart and press Checkout.
3. If you are not logged in, the Login window opens.
4. Log in and open the cart again.
5. Enter or check the customer's name and phone number.
6. Choose cash on delivery or showroom pickup.
7. Enter the address and city if delivery is selected.
8. Review the items, discount and total.
9. Press Place Order.

A confirmation appears with a local order number. The cart is emptied after the demo order is saved.

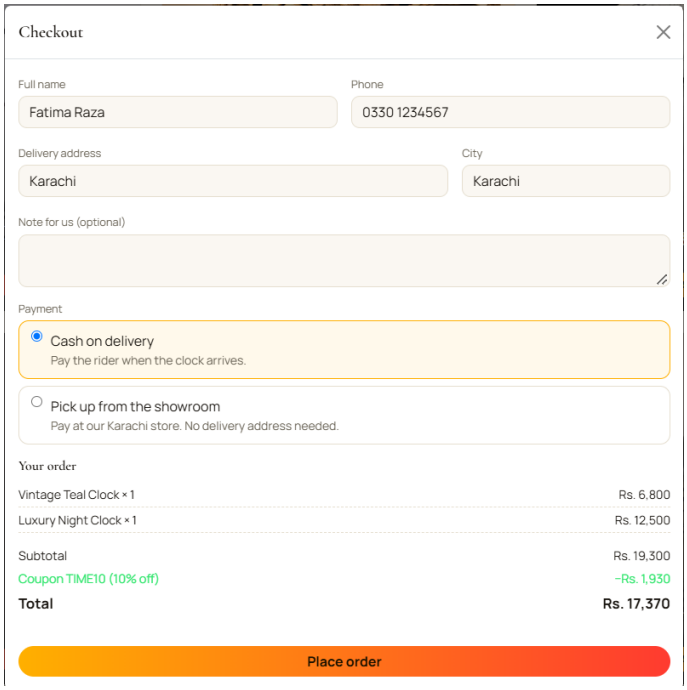

Figure 20: Checkout form and order summary

8.2 Delivery and Pickup

If delivery is selected, the address and city must be filled in. If showroom pickup is selected, these address fields are not required.

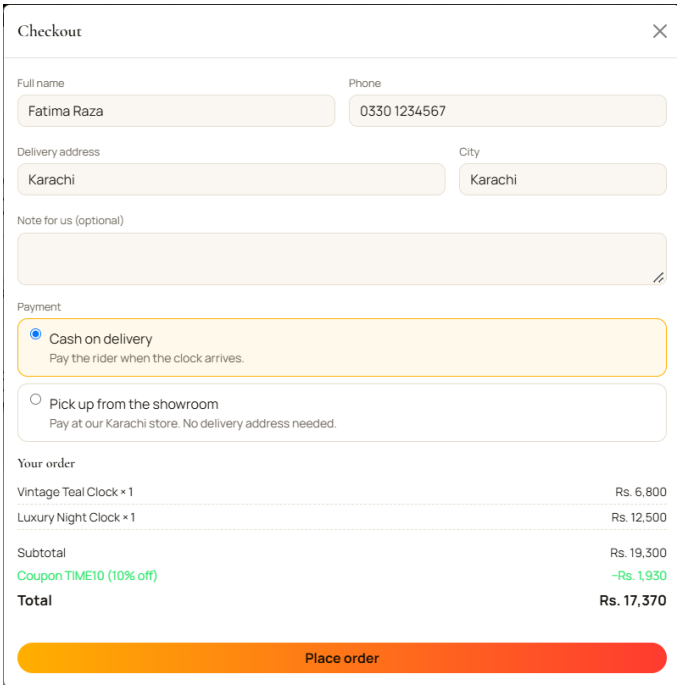

Figure 21: Delivery and pickup options

8.3 Phone Number Validation

The phone field accepts an optional plus sign and 10 to 15 characters made from digits, spaces and hyphens. If the number does not match the rule, an error appears and the order is not placed.

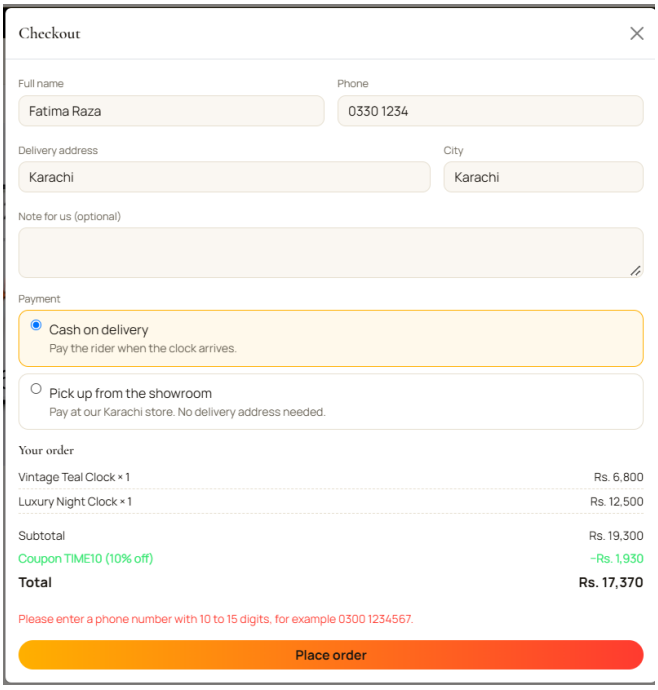

Figure 22: Checkout phone validation message

8.4 Checkout Limitation

The order is saved only in the current browser. No payment is processed and the order is not sent to the store. The order number and order status are for demonstration only.

9. Account Registration

Press Login in the header and choose the Sign Up tab. The registration form asks for full name, email, phone, gender, shipping address, password and password confirmation.

Fill the required fields and press Create Account.

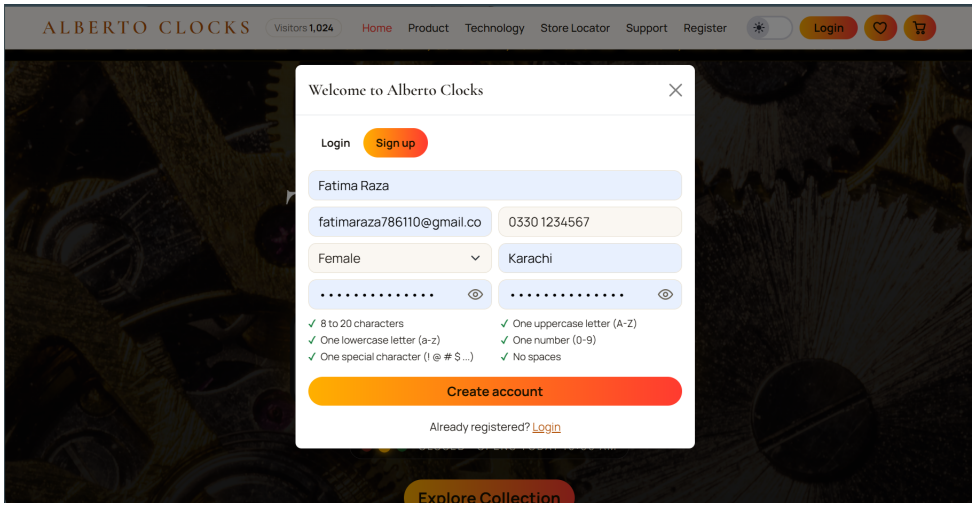

Figure 23: Sign-up form

9.1 Password Rules

A valid password must meet these rules:

- 8 to 20 characters.
- At least one uppercase letter.
- At least one lowercase letter.
- At least one number.
- At least one special character.
- No spaces.

The checklist updates while the visitor types. The eye button shows or hides the password.

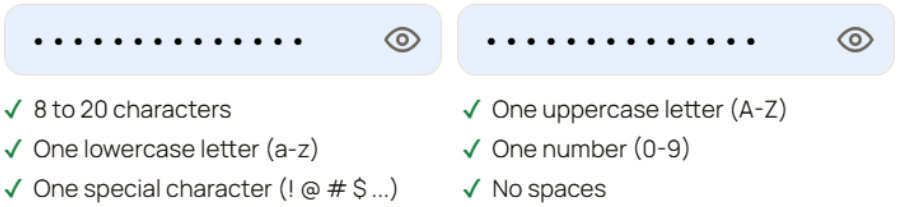

Figure 24: Password checklist

9.2 Password Does Not Meet the Rules

If the password is too short or is missing a required character, the form does not accept it. Check the password checklist and correct the password.

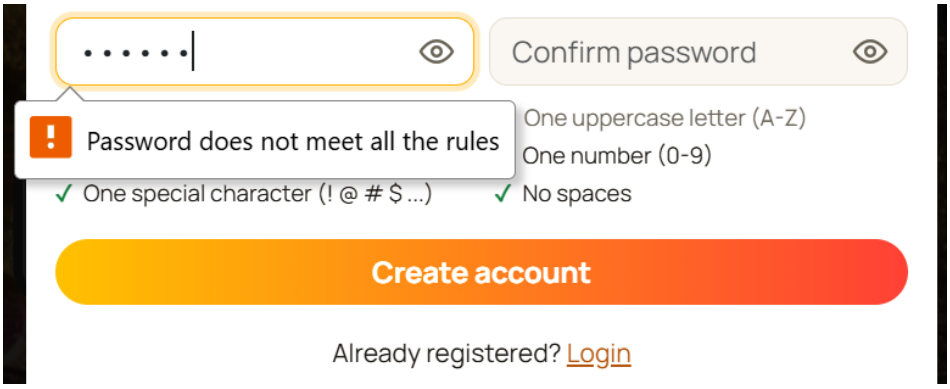

Figure 25: Password validation message

9.3 Passwords Do Not Match

The Password and Confirm Password fields must contain the same text. If they differ, the website displays a mismatch message.

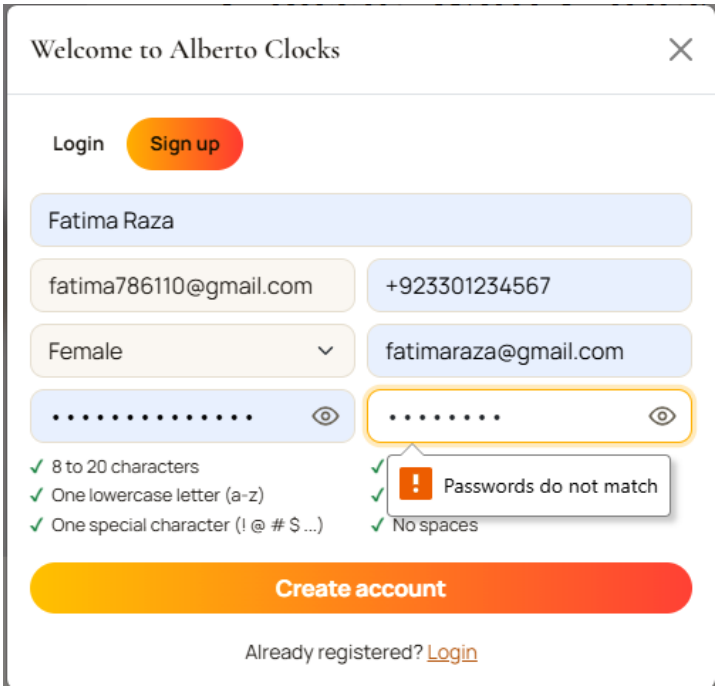

Figure 26: Password confirmation error

9.4 Email Already Registered

The website checks whether another account with the same email is saved in this browser. If the email is already used, the website asks the visitor to log in.

Figure 27: Duplicate email message

9.5 Successful Registration

When the details are valid, the website saves the demo account in browser storage and signs the visitor in.

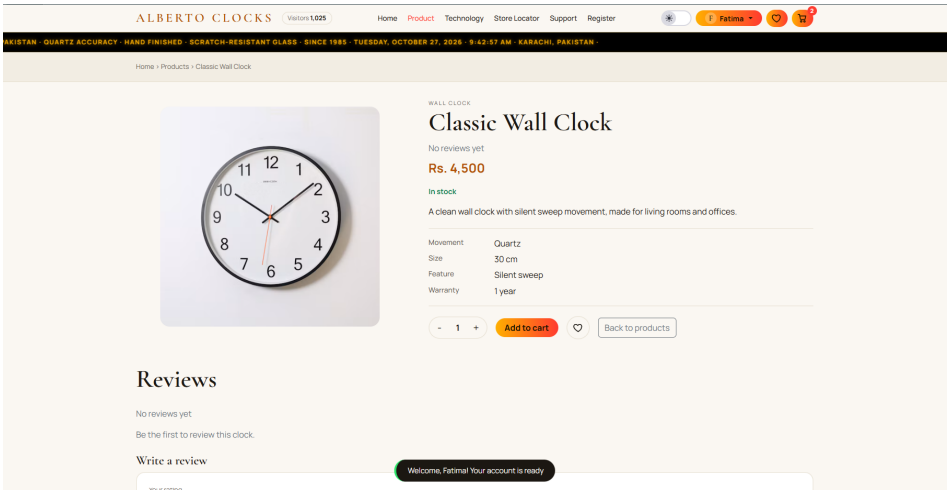

Figure 28: Successful registration message

10. Login

Press Login in the header. Enter the email and password saved during registration, then press Login.

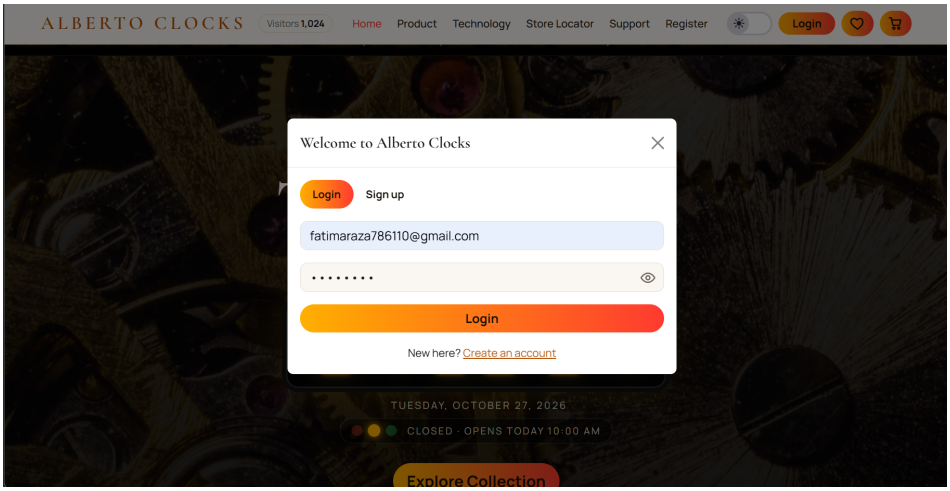

Figure 29: Login window

10.1 Incorrect Login Details

If the email or password is incorrect, the website displays an error. Check the details and try again. If there is no saved account in this browser, use the Sign Up tab to create one.

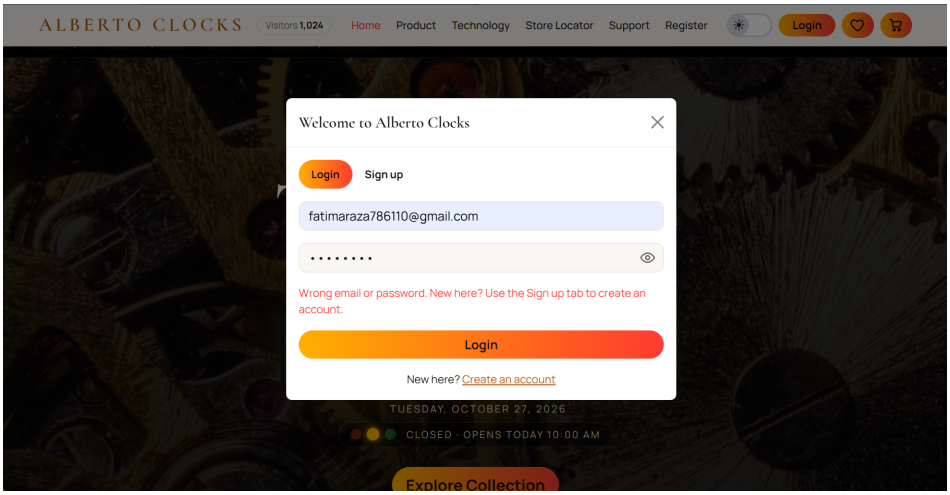

Figure 30: Incorrect login message

10.2 Show and Hide Password

The eye button changes the password field between hidden and visible text. It does not change the password itself.

11. Profile and Log Out

After logging in, click the name in the header to open the account menu.

- My Profile displays account details and saved orders.
- Log Out ends the active login session.

The profile may show name, email, phone, gender, address, joined date and order history.

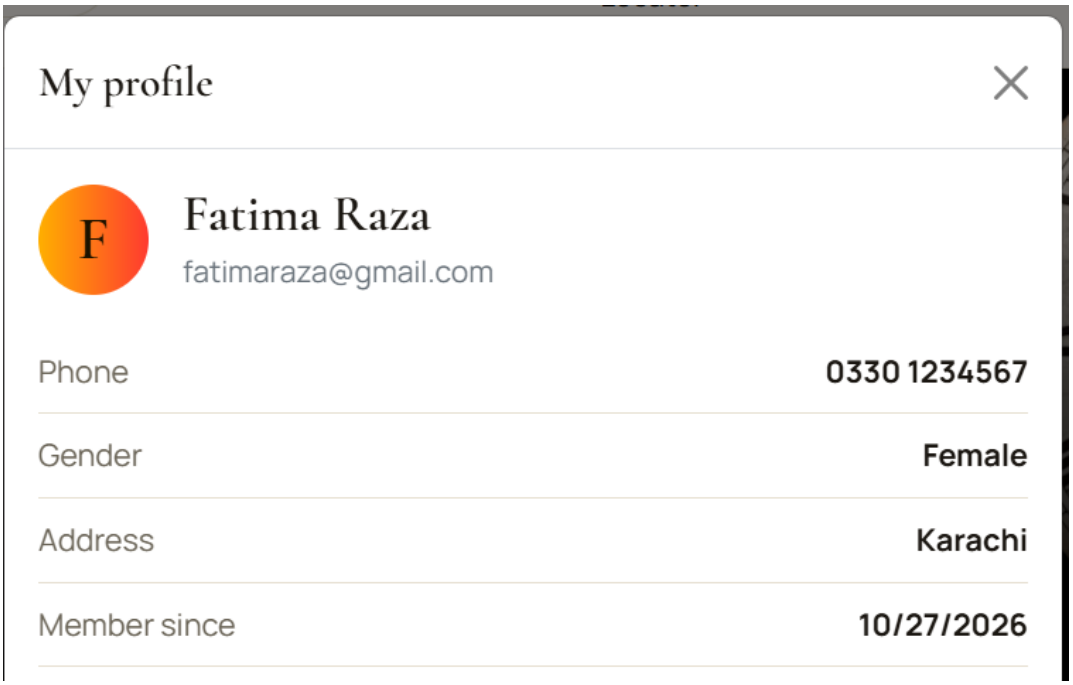

Figure 31: Profile and account menu

11.1 Order History

Orders made through the demonstration checkout appear in the profile. Each order can show its number, date, items, total and progress status.

Delivery orders move through Placed, Packed, Shipped and Delivered. Pickup orders move through Placed, Packed and Ready for pickup. The status changes after short intervals for demonstration.

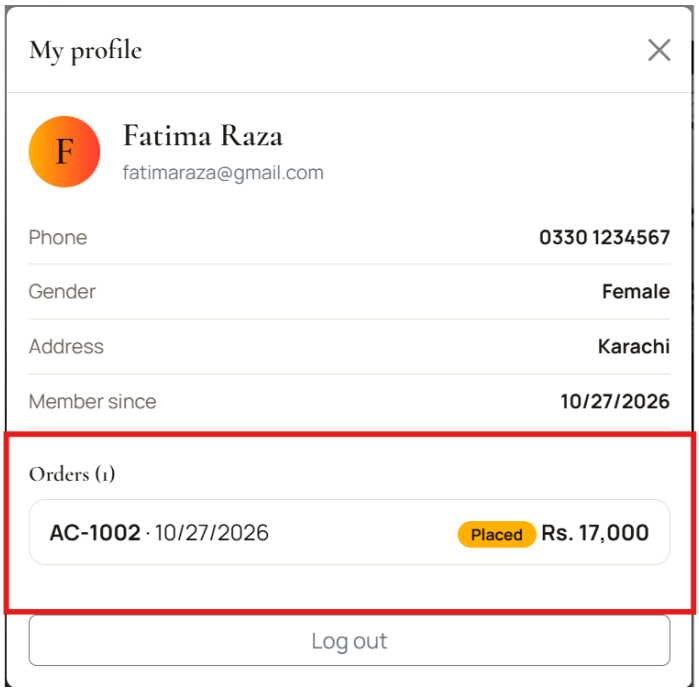

Figure 32: Order history and status timeline

11.2 Log Out

Select Log Out in the account menu. The header returns to the Login button. The saved account and order data remain in browser storage.

12. Wishlist

The wishlist lets visitors save clocks they want to view later.

1. Open the Product section.
2. Press the heart on a product card or details page.
3. Open the wishlist button in the header.
4. View the saved clocks.
5. Remove a clock or add it to the cart.

Wishlist information is saved in the current browser. Adding a clock to the wishlist does not reserve its stock.

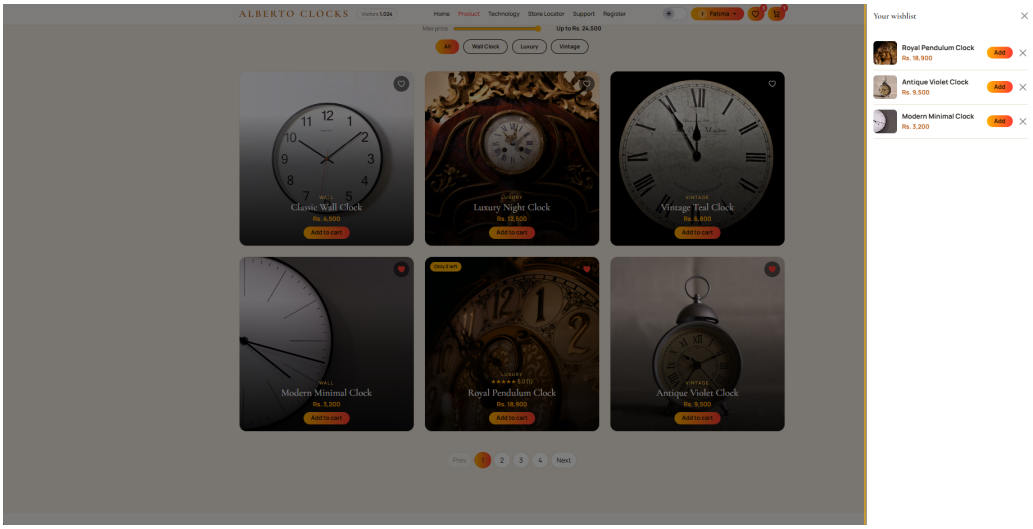

Figure 33: Wishlist panel

13. Product Reviews and Ratings

Open the full product details page and find the Reviews section. A visitor must be logged in before submitting a review.

1. Select a star rating.
2. Type the review text.
3. Keep the review within the 400-character limit.
4. Press the submit button.
5. Check that the review appears in the list.

The product page shows the available reviews and average rating. Reviews are saved in the current browser.

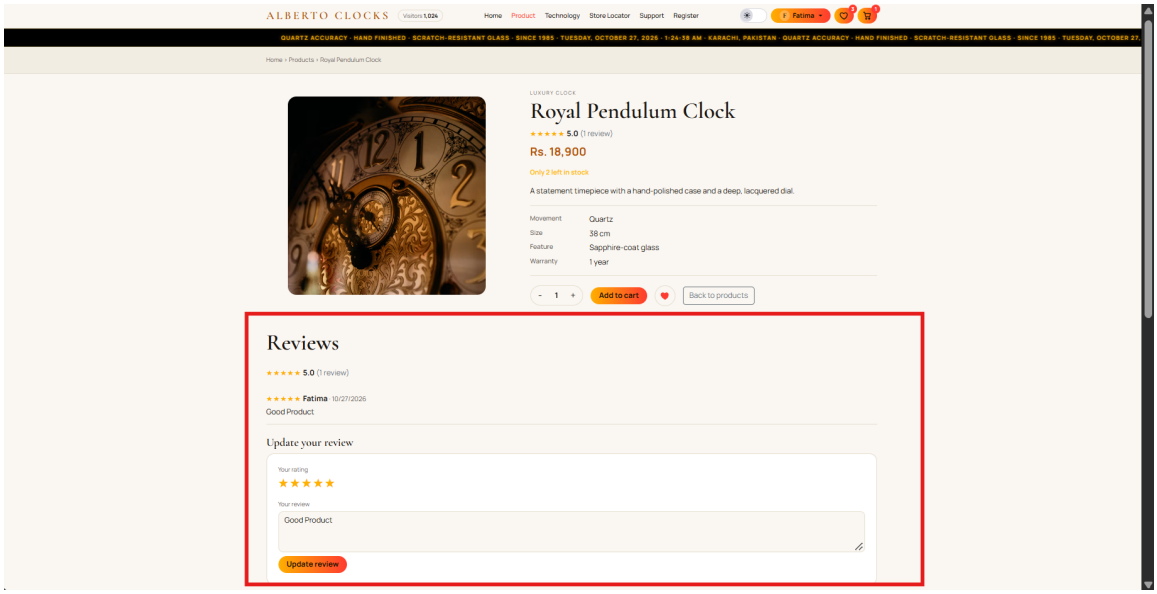

Figure 34: Product reviews and ratings

14. Store Locator

The Store Locator displays showroom information and an embedded map.

- Showroom name and address are displayed in the section.
- Opening hours are shown beside the map.
- Phone and email details are displayed where available.
- The map can be zoomed or moved.

The map needs an Internet connection and may not appear while offline.

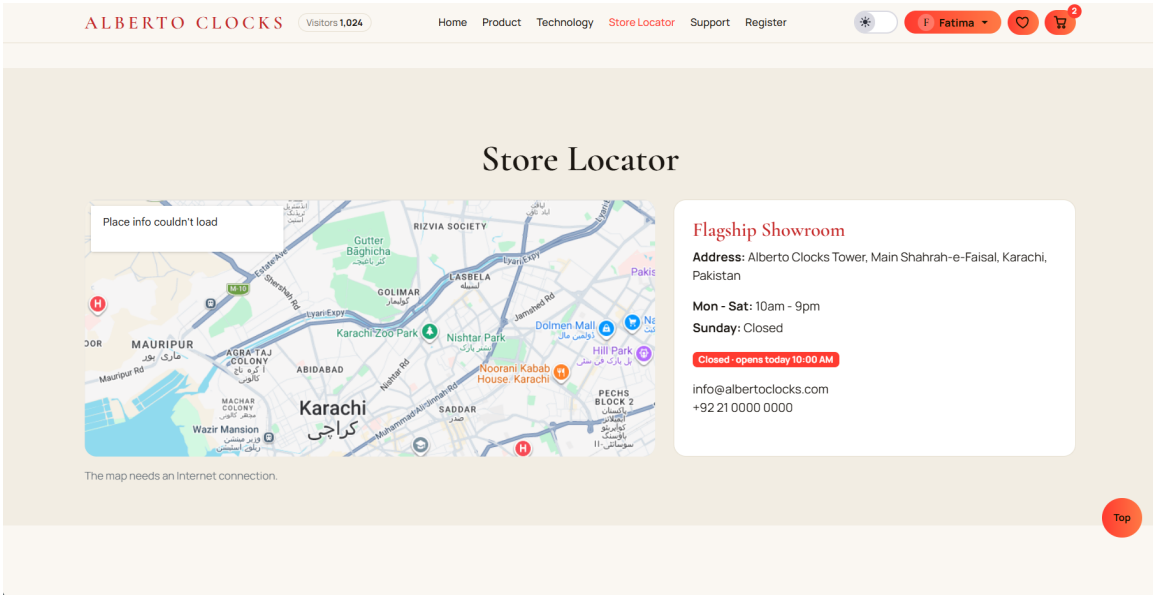

Figure 35: Store Locator and map

15. Support Section

The Support area contains contact information, FAQs and a contact form.

15.1 Frequently Asked Questions

Click a question to open the answer. Click it again to close the answer.

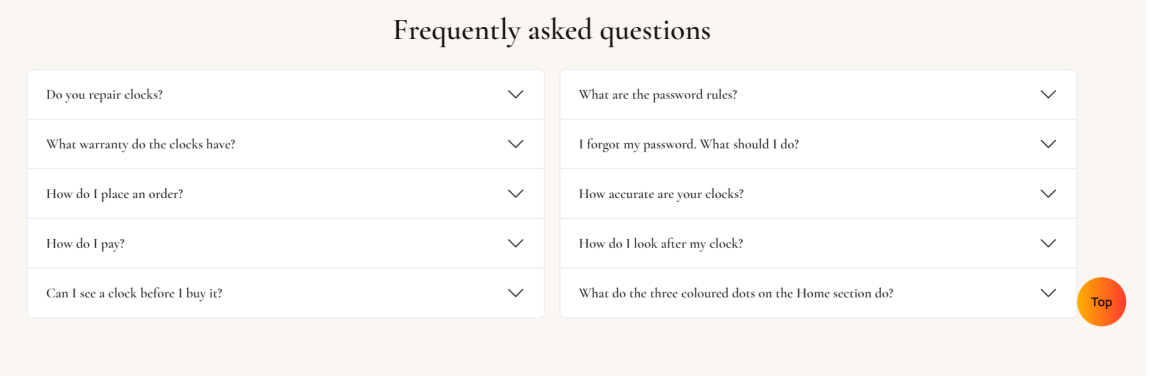

Figure 36: Frequently Asked Questions

15.2 Contact Form

The contact form asks for name, email and message. Fill in the required fields and press Send Message. The website shows a confirmation and saves the demonstration message in the current browser. It does not send an actual email.

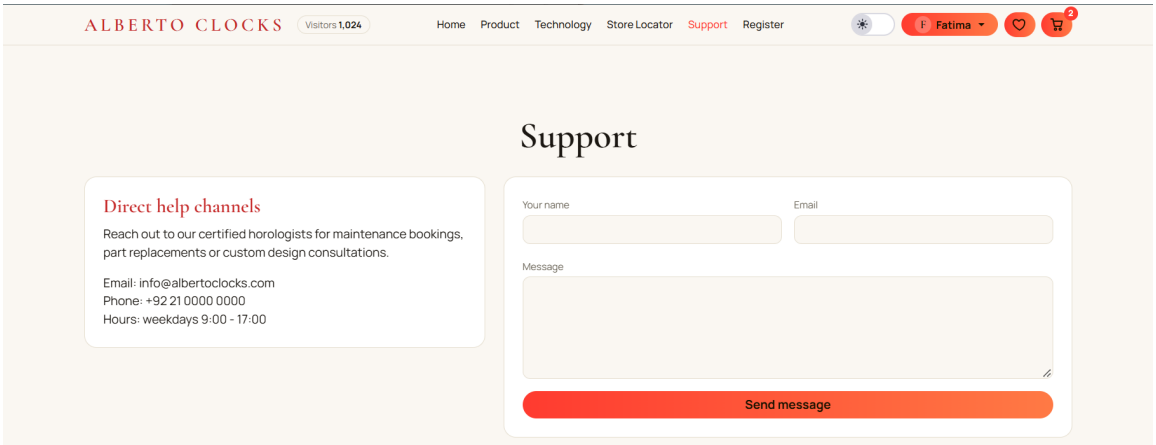

Figure 37: Support and contact form

15.3 Newsletter Form

Enter an email address and press Join. A confirmation appears on the page. The current project does not send the address to a mailing service.

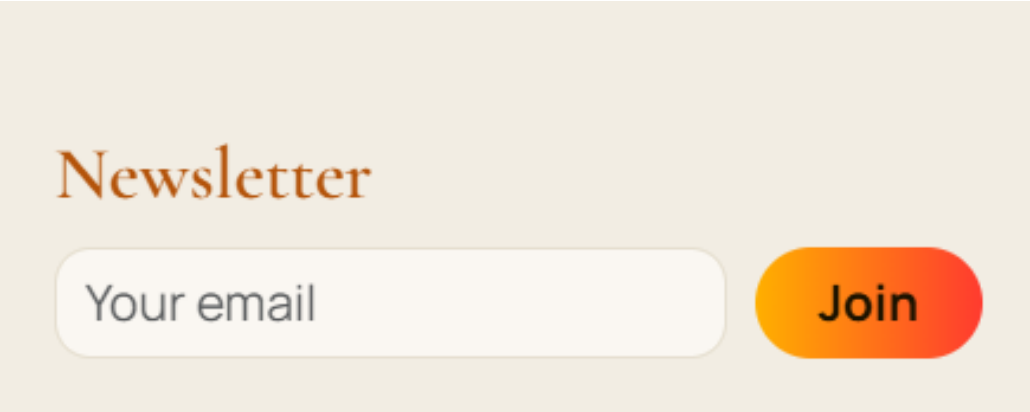

Figure 38: Newsletter form

16. Register Section

The Register section is another way to create a demo account. It uses the same fields and password rules as the Sign Up tab.

1. Enter the full name.
2. Choose gender.
3. Enter phone and email.
4. Enter the shipping address.
5. Enter a password that meets all the rules.
6. Confirm the password.
7. Press Create Account.

If an error appears, correct the relevant field and submit again.

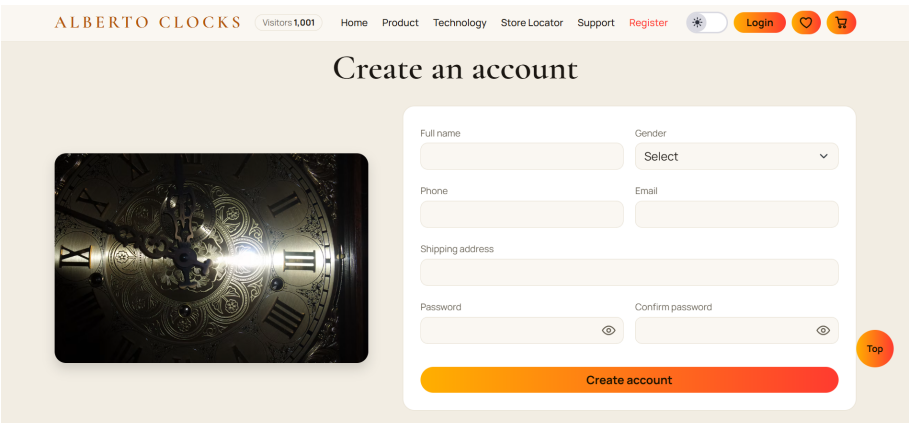

Figure 39: Register section

17. Quick Reference

I want to...	**What to do**
Find a clock	Type a name in Search.
Sort clocks	Use the Sort menu.
Filter by category	Choose Wall, Luxury or Vintage.
Limit the price	Move the price slider.
See product details	Click the product name or picture.
Add a clock to cart	Press Add to Cart.
Use a coupon	Enter TIME10 in the cart and press Apply.
Place a demo order	Log in, open cart and complete checkout.
Create an account	Choose Login then Sign Up, or use Register.
See my orders	Click the name and open My Profile.
Save a clock	Press the heart and open Wishlist.
Write a review	Log in and open product details.
Contact the store	Use the Support form.

18. Troubleshooting

Problem	**Solution**
Product list is empty	Open the site with Live Server and check that products.json exists.
Pictures or map do not load	Check the Internet connection. Some resources are remote.
Buttons do not respond	Reload the page and check that JavaScript files loaded.
Login does not work	Check the email and password entered during registration.
Password is rejected	Check all password rules and make sure the fields match.
Cart data is missing	Check that you are using the same browser and site address.
Account or orders disappeared	Browser storage may have been cleared. Data is not synced between devices.
Checkout says offline	Check the Internet connection and try again.
No email arrives after contact submission	The form shows a message but does not send email.

19. Important Project Limitations

Alberto Clocks is a learning project. Accounts, cart items, wishlist entries, reviews, messages and orders are saved in the current browser. They are not shared with other devices. Clearing browser data can remove the saved information.

Checkout does not take payment and does not send a real order to the store. Order status is a demonstration. Contact and newsletter forms display confirmation messages but do not send actual emails. The project does not use a database or a server-side account service. Do not use real passwords or sensitive personal details when testing a public copy.

End of User Guide
